**C-Tech-I**, for many years, has been recognized as one of the highest quality stainless steel brands made in the world. Many unique and "One of a kind" features have helped C-Tech-I justifiably earn its reputation as likely **"THE BEST SINK MADE"**. Some of these features include:

- Ageless, yet contemporary, Italian design
- Highest quality stainless steel, featuring thick 16 gauge bowls, and 15 gauge mounting rims (on double and triple bowl styles).
- Euro 3-piece design and construction on double and triple bowl styles. This is usually found only on the most expensive European made sinks that sell for double or triple C-Tech-I prices.
- Extra deep sink bowls (most 10" to 12" depth) and a unique finish that resists scratching.
- Uncomparable sound deadening features such as double-thick sound deadening coating and extra thick sound deadening pads on all flat surfaces.
- A complete kitchen package that includes: Special basket drain/strainer; grids / grates; mounting hardware; mounting template; and (on most models) a stainless steel colander.

**"BOTTOM LINE"** ... For the very discriminate, that wants only the finest sink that money can buy, C-Tech-I should be **THAT CHOICE**.

An exclusive, heavy 15 gauge line of sinks which will complement any kitchen. Ridge sinks are a "complete package". All models include:

- Cutting Board
- Sink Grid
- Colander
- Strainer
- Roll-Up Dish Rack

RG33APRON With Included Accessories

Ridge sinks are designed to be used with a reveal cutout. They feature a ledge that runs all around the inside of the sink, one-half inch down from the top, into which accessories can "float". This is called the "lower level".

The "upper level" is the top of the sink, which is created by means of the reveal cutout.

For all models, the included colander and roll-up dish rack sit in the "lower level". For the two undermount models RG33UM and RG46UM, the included cutting boards are longer, and designed to sit in the "upper level". They will not fit into the "lower level", and would require a **Reveal Cutout**. The same applies to the optional "upper level" cutting board CB-012.

"Due to the kitchen sinks long straight sides and front, it is very difficult to guarantee perfectly straight lines during the curing process. The manufacturer's warranty policy allows up to 6mm (approximately 1/4") of curve or unstraightness. Since this sink is usually mounted with an overhang, the back and sides should not be an issue and the front is acceptable to most customers if within this tolerance. *Please take this potential small variation into account before ordering.*"

**Bath Vanity Models:** An unusual line of Farmhouse-inspired vanity sinks with straight walls and tight 90° corners. Something different!
